Pressgang Mutiny

TECHNICAL RIDER 2026 · FOUR-PIECE

SOUND SYSTEM

The system provided should be well maintained and in full working order on arrival. Please make sure it gives even coverage of the venue, paying particular attention to the front of the stage, with adequate front and in-fills. This is not just an acoustic show: it features heavy bass, drumbeats and sub drops throughout, so subs are a critical part of the performance.

FOH AND MONITOR ENGINEERS

Pressgang Mutiny do **not** travel with FOH or monitor engineers. We expect experienced engineers who know the system to be on hand for set-up, sound check and the whole show.

Unless agreed beforehand (a festival line check, for example), we need 1 hour for sound check after set-up.

Ideally we need a monitor each, so four wedges, but we can be flexible. Please let us know before arrival if that isn't possible.

STAGE PLOT

Left to right as seen from the audience. Josh needs a 4–6 ft table for the DJ set-up and a power drop at his position and at James's.

INPUT LIST

CH	SOURCE	INPUT	STAND	PLAYER	NOTES
1	Vocal	SM58	Tall boom	Stefan	
2	Melodeon	SM57	Short boom	Stefan	Not used at every show
3	Concertina	XLR +48V		Stefan
